

How to organise your pet!

My son recently wanted a cat. We had been wanting a kitten for a long time and decided it was finally time to get one. We heard about a free kitten from a friend that needed a new home. We went to meet him and it was love at first sight. From his big green eyes to the extra large un-proportioned paws, my youngest son was smitten and loved everything about him.

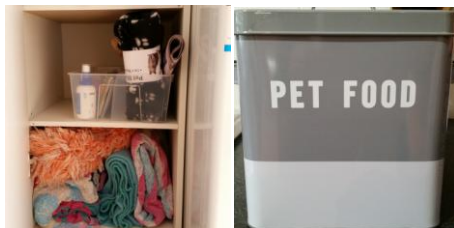

Felix our new kitten

I then had the excited but urgent run to kmart before we bought our new kitten home. I got what I needed (bed, blankets, food bowl, kitty litter tray etc) and bought it all home. Then it hit me, how was I going to organise everything?

I had just been to ikea and found this caddy for a couple of dollars that I was going to use to organise under the sink but decided it would be perfect for the cat things. Everything fits perfectly and is in 1 spot. I keep it in the laundry cupboard and the extra old towels I keep in the shelf underneath. Kmart had this great pet food tin that keeps his dry food nice and fresh and looks nice in the pantry.

Pets don't really need much but love and care. What they do need, I recommend keeping it in a central spot that is easily accessible when you need it.
